

Tanaka Hiroshi

Senior Full-Stack AI Engineer | Data Analyst

tanaka.hiroshi9231@gmail.com | <https://www.linkedin.com/in/tanaka-hiroshi-474126405>

Osaka, Japan

PROFESSIONAL SUMMARY

Senior Full-Stack AI Engineer with 10+ years of experience across full-stack web development, data analytics, and AI engineering. Proven track record of building scalable web applications, implementing data-driven solutions, and deploying production-grade AI models. Strong expertise in bridging front-end systems with machine learning backends.

PROFESSIONAL EXPERIENCE

Cofame, Inc

AI Engineer

Sep 2023 – Nov 2025

- Led delivery of production AI features end-to-end: data preparation, model selection, training/evaluation, deployment, and monitoring.
- Developed and deployed AI-enhanced chatbots for enterprise clients, improving customer support efficiency by 35%.
- Integrated LLMs (GPT, Claude) into existing business communication platforms for unified relationship search.
- Built RESTful APIs serving ML predictions, handling 10K+ requests/day with sub-200ms latency.
- Collaborated with cross-functional teams to migrate legacy systems to cloud-native AI architectures on AWS.
- Implemented LLM-enabled workflows (e.g., search/assist/summarization) with RAG, prompt/version management, and automated evaluation to reduce regressions.
- Designed MLOps pipelines (CI/CD for models, reproducible training, experiment tracking) and introduced monitoring for quality, drift, and operational metrics.

ABEJA, Inc

Data Analyst

June 2021 - Aug 2023

- Owned analytics lifecycle: requirements - instrumentation - ETL - data models - dashboards - insights and recommendations.
- Built and maintained reliable data pipelines and curated datasets for decision-making; improved data quality with tests and anomaly detection.
- Delivered executive-ready dashboards and self-serve analytics, reducing manual reporting and improving visibility into KPIs.
- Analyzed large-scale datasets (100K+ records) to generate actionable business insights for manufacturing and retail clients.
- Collaborated with AI engineers to validate model training data, improving model accuracy by 15%.

New Crew Systems

Full Stack Web Developer

Jan 2016 - May 2021

- Designed and maintained full-stack web applications for enterprise client in IT consulting and system development.
- Built responsive front-end interfaces with React and Vue.js, improving user engagement by 25%.
- Developed back-end services with Node.js and Django REST Framework, handling authentication, data validation, and API integration.
- Improved system stability by adding automated tests, monitoring, and structured release processes.
- Implemented backend APIs, database schema design, and frontend features with a focus on performance and usability for on-site operations.

TECHNICAL SKILLS

- Languages: Python, JavaScript/TypeScript, SQL, HTML, Go
- Frontend: React/Next.js, Vue.js, Tailwind CSS, Bootstrap
- Backend: Node.js, Django, Flask, FastAPI
- Data: ETL/ELT, data modeling, warehousing, analytics engineering, A/B testing, BI dashboards
- AI/ML: NLP/CV (Hugging Face, spaCy, OpenCV), classical ML, deep learning, LLM integration, RAG, model evaluation
- MLOps: training/inference pipelines, model registry, CI/CD, monitoring, drift/quality checks
- Cloud/DevOps: Docker, Kubernetes, CI/CD, AWS
- Database: PostgreSQL, MySQL, Redis, Elasticsearch

EDUCATION

Osaka University, Osaka, Japan

Bachelor of Engineering in Computer Science

Apr 2011 – Mar 2015

CERTIFICATION

HackerRank Certification

[Frontend Developer \(React\)](#)

HackerRank Certification

[Software Engineer](#)
